

Tempest Mid/high enclosure - Baffle layout & assembly

Note: There are two support braces at the top & bottom which are placed 80 mm from the sides, running from rear to front. These are to strengthen the box to support the weight, being between the two woofer boxes.

Tempest Mid/high enclosure - Brace details

Tempest Mid/high enclosure - Parts list

Parts for two (2) mid/high modules

4x Baffle/Rear (600x400 mm)

8x Top/Bottom/Inner wall (362x362 mm)

4x Side (600x362 mm)

8x Support brace (50x362 mm)

All pieces made from 19 mm thick MDF board.

Use glass fibre wool to damp the mid chambers. Stuff fully, except for some space around the driver to breath. The tweeter chamber has room for the passive filter.
